Expense Benchmarking for Life, Health, Annuity, and Retirement

Our Ward benchmarking data and industry insights uncover opportunities to improve the efficiency of your company operations, empowering you to increase profitability.

In a *do-more-with-less* environment, our clients find that a competitive advantage is increasingly more difficult to achieve and sustain. In order to get and stay ahead of the curve, insurance companies need better data and insights to identify real opportunities for improvement across all levels of the organization.

More than ever, leaders in the insurance industry are asking:

- Are my staffing levels appropriate?
- Where can I trim expenses and still maintain an efficient operation?
- Where are my best opportunities to improve operating margin?
- What is the return on investment for our IT spend?

Benchmarking sharpens your perspective on performance

Benchmarking is a key component in capturing the full picture of where your company stands relative to your peers and becomes integral to identifying opportunities to maximize resources and fund your growth strategy. We are the leading provider of benchmarking studies for the insurance industry. We analyze **expenses**, **staff levels**, **compensation**, **operational metrics**, **and business practices** for all areas of company operations. From our proprietary data, we deliver industry insights that help you make fact-based decisions about improving your operational performance.

We empower you to:

Assess your operational performance compared to other companies

Analyze and prioritize improvement opportunities

Optimize company resources and maximize efficiency

Improve profitability across the organization

We're here to empower results

More than **3,000** benchmarking engagements performed since 1991, including more than half the **top 100 companies**.

A streamlined and holistic process

Our Ward benchmarking is a streamlined, holistic approach to compare your operations to operations at other companies on an apples-to-apples basis. Our experienced consultants partner with you to provide an efficient benchmarking process, minimizing the use of your company resources. Insurance companies operate with different distribution systems, product focus, and operating models. Using our proprietary benchmarking software, we map your expense and headcount data into a common framework. We segment companies by major operations to make the output meaningful for internal and external comparisons, and then meet with you in person to review the data and ensure the integrity of the data source.

We analyze 49 functions for life, health, annuity, and retirement
